1996

## INTRODUCTION

In the fall of 1986, at the suggestion of the Group in Support of Excellence and with the support of the KITE program, the Red Deer College Library established the Red Deer College Author Collection.

This collection was established to bring together publications by Red Deer College staff, both past and present, and to recognize the contributions made to scholarly research by these staff members. In February 1988 the Library issued a bibliography listing all the items in the collection. At that point, the collection consisted of 90 items authored by 32 individuals. This fifth edition of the Red Deer College Author Collection bibliography lists 410 items by 129 individuals. The list includes monographs, theses, periodical articles, and audiovisual items.

The bibliography is divided into two sections. The first section lists individual items in the collection alphabetically by author. Under each author's name items are listed chronologically by year. A typical entry lists the title of the work, the title of the periodical (if the item is a periodical article), the imprint, and the collation. Each item listed is available in the Library and is listed in the online catalogue under the author's name, the title, and the subject or subjects including a special subject heading, "Red Deer College Authors". Where known the date when each individual began working at Red Deer College is given. When appropriate, the date an individual left the College is also given.

The second section lists articles that have appeared in Red Deer College's *Directions: a Faculty Development Newsletter* of Red Deer College.
